Methodology notice

1. This document bundle contains run-number, dispatch, and patient-care-report information relating to Millstadt Ambulance Service, Millstadt EMS, and Millstadt EMS ESD for calendar years 2022, 2023, 2024, 2025, and 2026 through August 13, 2026.
2. The figures in this bundle represent different types of operational information and should not be treated as identical or directly interchangeable without considering the definitions and limitations described below.
3. ESO patient-care-report figures represent the number of patient care reports, or PCRs, generated in ESO during the applicable period. An ESO PCR count is an administrative record count. It is not necessarily a count of unique dispatches, unique incidents, unique patients, transports, ambulance responses, CENCOM call numbers, or individual run numbers.
4. Website dispatch-tracking figures represent dispatch events recorded in the Millstadt EMS website call-volume reporting export reflected in the source PDFs for the applicable period. The website dispatch-tracking system is maintained separately from the ESO patient-care-report system. The two systems use different records and counting methods.
5. The term "independently verified" should not be used for these figures unless Millstadt has separately completed and documented an independent reconciliation against identified source records.
6. Before January 1, 2026, CENCOM records and tracking practices did not consistently identify or maintain individual Millstadt EMS run numbers in the same manner as the current website dispatch-tracking system. CENCOM-related call numbers, historical run numbers, website dispatch totals, and ESO PCR counts for periods before January 1, 2026, may differ and should not be treated as exact equivalents.
7. A difference between these figures does not, by itself, establish that a dispatch, call, patient-care report, transport, or run was omitted or improperly counted. Differences may reflect numbering conventions, dispatch-recording practices, system fields, reporting periods, data-entry practices, corrections or adjustments, the distinction between dispatches and PCRs, or the transition between recordkeeping systems.

8. The figures should be quoted and characterized according to the definitions above. A person reviewing, quoting, reproducing, or distributing this material should not knowingly combine different categories of counts and present the result as a single undifferentiated total, omit a material limitation in a manner that creates a materially misleading impression about what a number measures, or identify Millstadt as the author, verifier, approver, or source of a modified or generated version that Millstadt did not create or approve.

9. This notice does not state that every discrepancy, error, estimate, inference, opinion, criticism, or unfavorable characterization is unlawful or defamatory. It does not restrict lawful criticism, commentary, journalism, quotation, political speech, public discussion, good-faith disagreement, or other use protected by applicable law.

10. This bundle is intended to contain operational counts and run-number information, not medical or patient-specific information. Medical and patient-specific information must not be included in the public bundle merely because it appears in an underlying dispatch or ESO record.

11. An altered, cropped, incomplete, edited, summarized, transcribed, reconstructed, or AI-generated version should be identified as a modification or derivative and should not be represented as the complete, unaltered Millstadt record.
